# ReFuel EU Aviation

- ERA supports **targets** proposed by EC
- **Supply** at airports
  - ➔ SAF should be accessible to ALL interested airlines → Book and claim system ?
- ERA understands the need to avoid carbon leakage via the **anti-tankering provision**
  - ➔ BUT possible operations and safety implications
  - ➔ Allow for exceptions (tankering allowances) with a prior proper justification due to operational, regulatory or safety issues
- EU approach only
