10 years of experience has taught us that achieving the systemic change we need requires a different order of innovation.

Incremental

System innovation

Transformational

Project finance model

Single projects and incremental change

Siloed and fragmented activities, often focused on technological improvements

Portfolio finance model

Portfolio of connected innovation projects that learn from each other

Wide appreciation of change levers

eit Climate-KIC

Co-funded by the European Union

Testing and demonstrating transformative solutions on climate resilience, mainstreaming **nature-based solutions** in systemic transformation

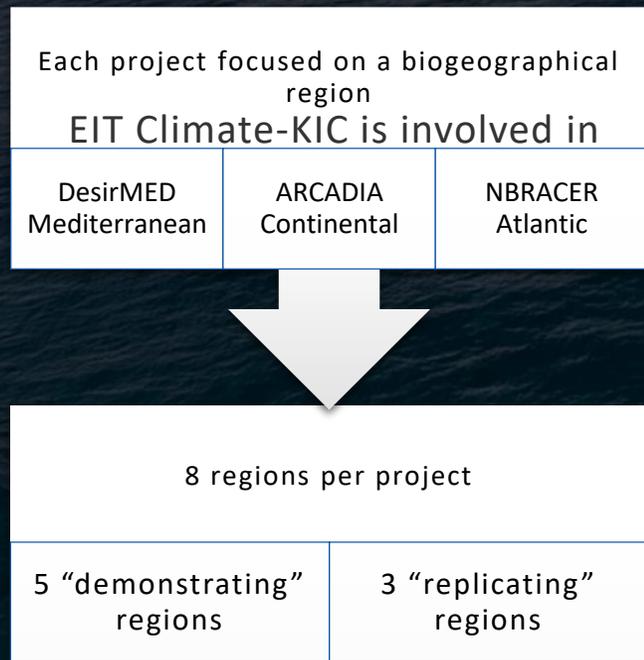

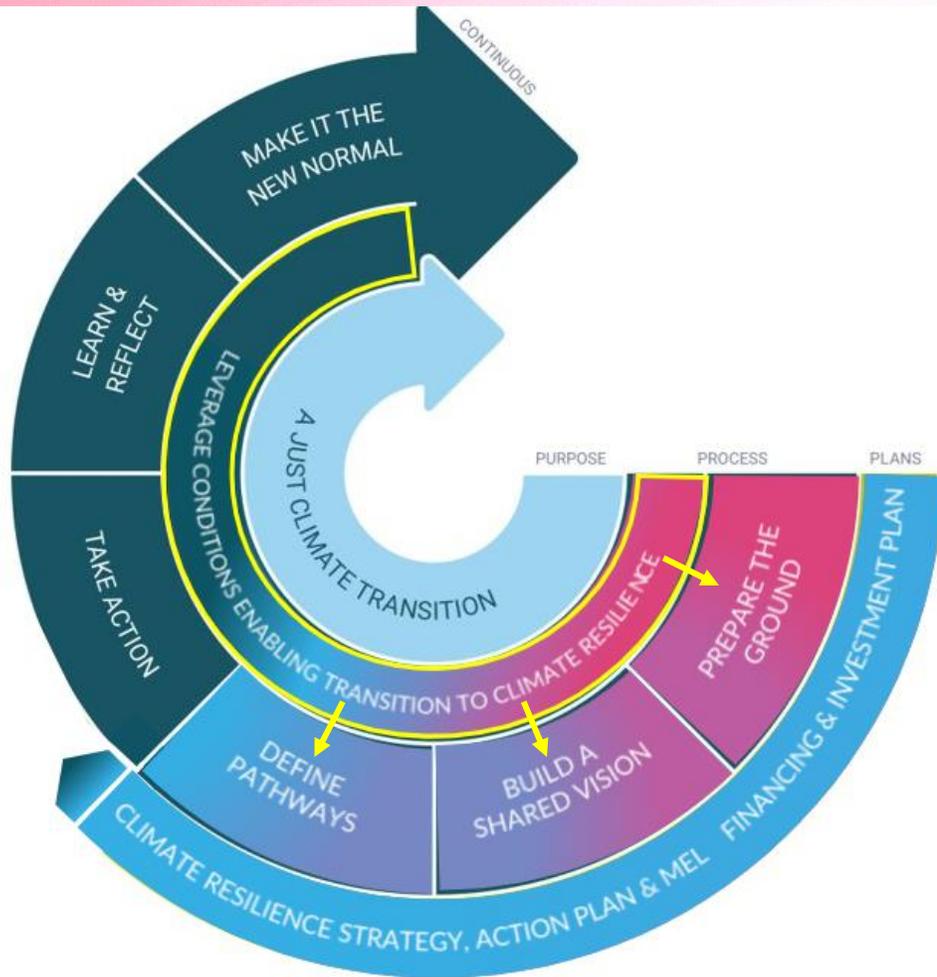

7 projects

114.4 mio €

4–5 years

6 biogeographical regions
(Mediterranean, Continental, Atlantic, Boreal, Alpine, Macaronesia)

76 sites (**44** demonstrators and **32** replicators)

Map legend:

Pathways2Resilience (P2R) accelerates transition to climate resilience in Europe

€21M allocated in sub-grants to help regions develop transformative pathways to climate resilience via **2 open calls**.

100+ **European regions and communities** assisted in identifying locally-led climate resilience solutions.

10+ **Innovation Practice Groups & Finance Innovation Lab** to increase knowledge and design solutions and business models for climate adaptation and resilience.

P2R First Call for Regions and Communities

Applications welcome until

**Extented until
27 February 2024, 12:00**

Register your application via:
