

Study on the Economic Benefits of MPAs and SPMs

Main project partners:

PML | Plymouth Marine Laboratory

Commissioned by
DG MARE and
managed by
EASME

Family of reports available at publications.europa.eu

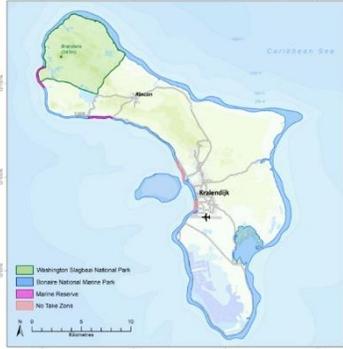

1. Main report: providing a synthesis and discussion of the findings from three primary research outputs
2. Literature review: of robust economic evidence
3. Stakeholder consultation report: presenting stakeholder opinions and examples, drawing on an online survey, interview programme and workshops
4. Case studies report: providing in depth examination of 10 MPAs in the EU and its overseas territories

ICF proprietary and confidential. Do not copy, distribute, or disclose.

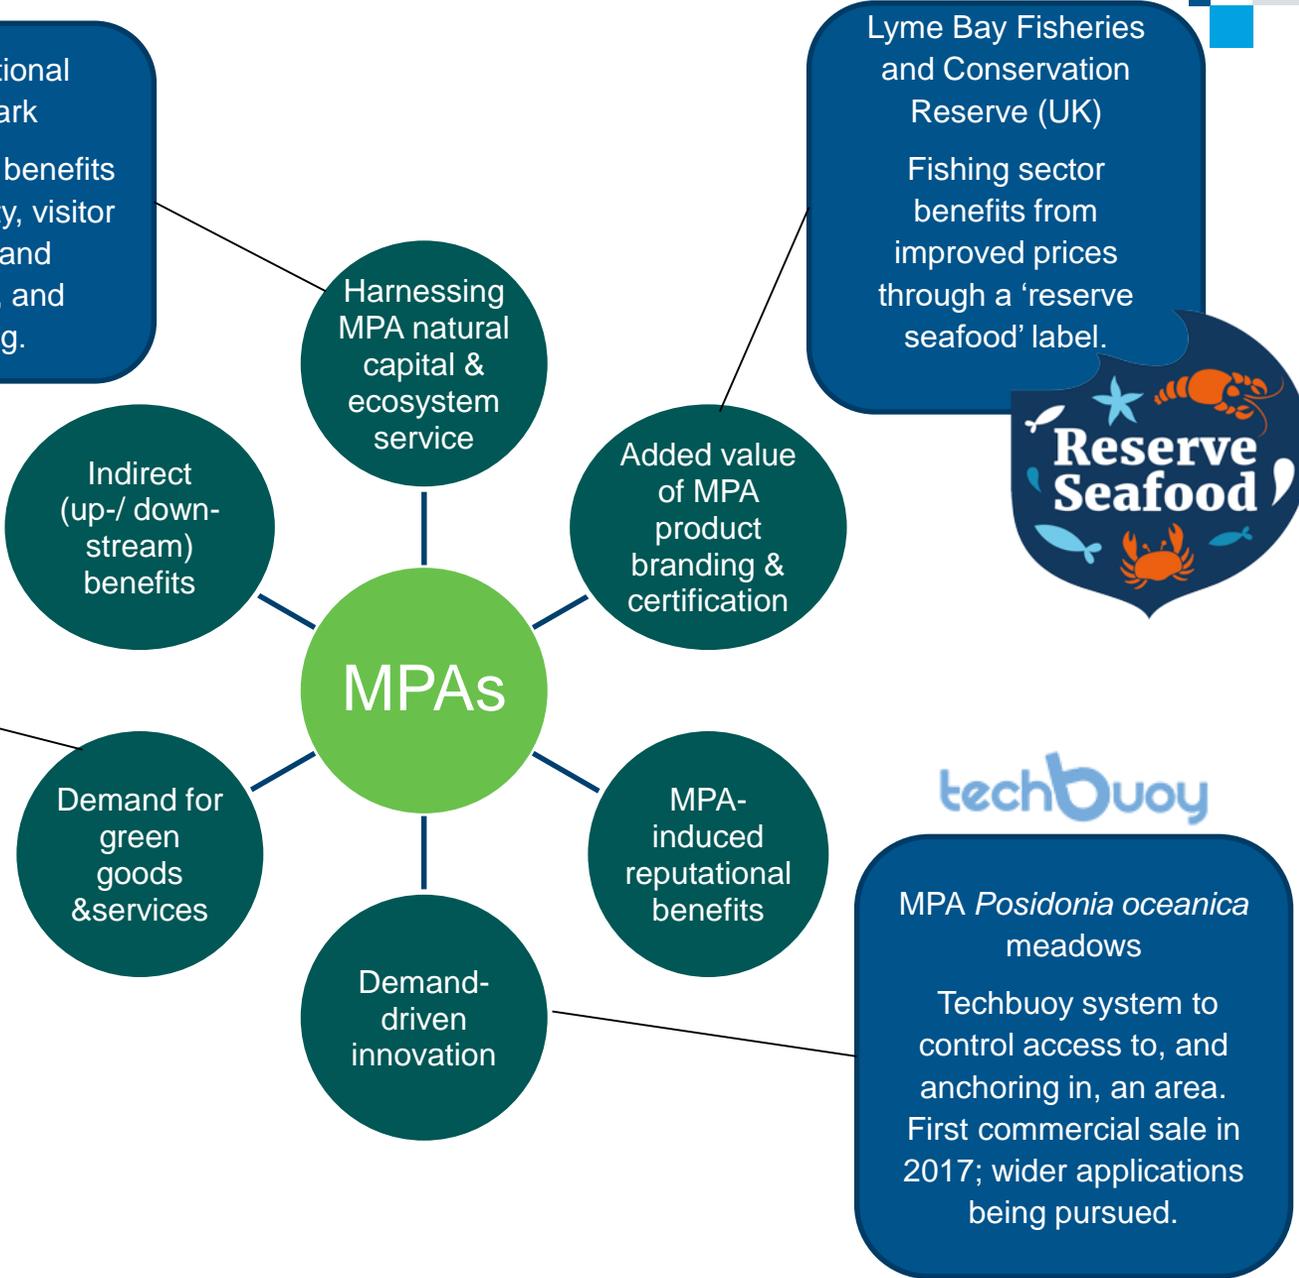

MPAs can generate market benefits for a number of different sectors through a range of different mechanisms

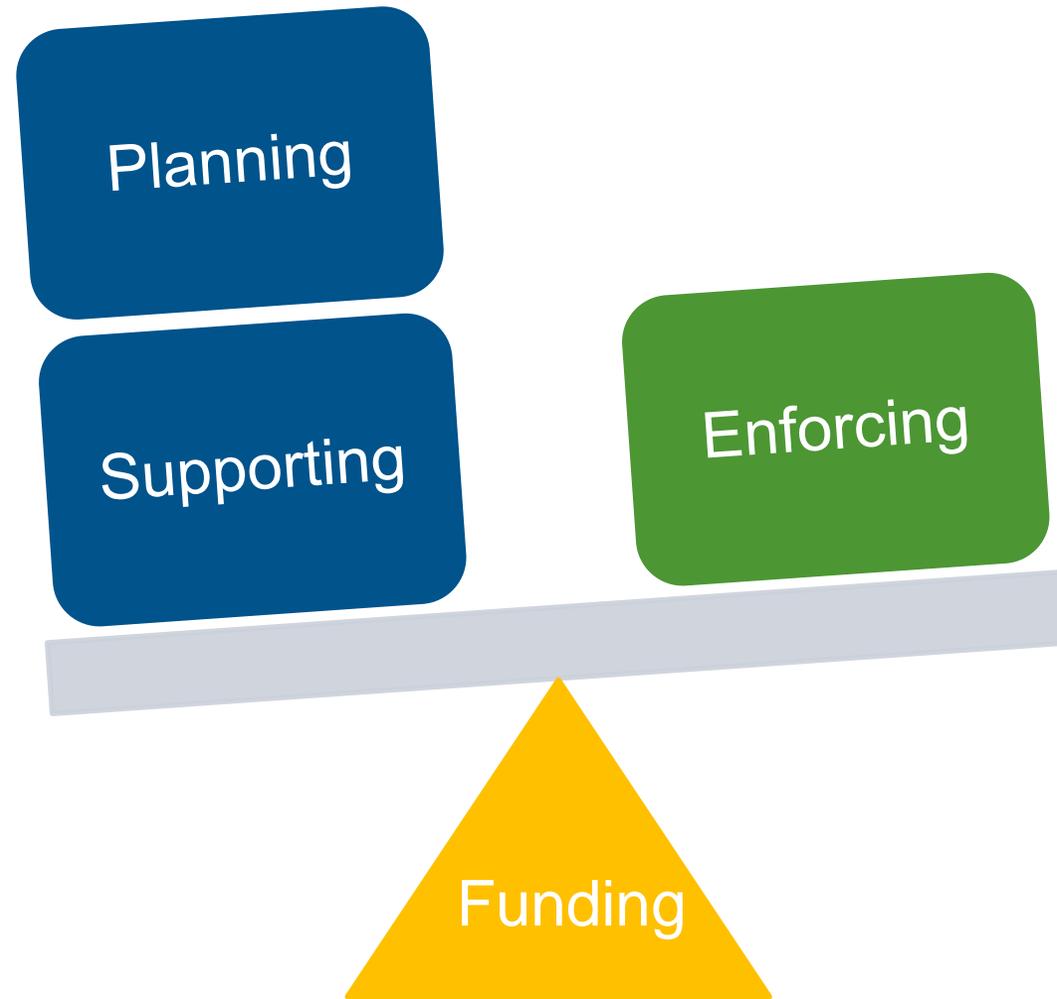

Bonaire National Marine Park
Tourism sector benefits from reef quality, visitor education and experience, and marketing.

Dutch Wadden Sea UNESCO World Heritage Site and N2k site
Eco-engineering project of >€2.5million; to enable continual nourishment of the island of Griend

There are actions and requirements to support the sustainable realisation of blue economy benefits from MPAs

Thank you
